Streaming Product Release Notes Version 15.7.4

The release date is Friday, November 18, 2022 for NA data center
The release date is Tuesday, November 22, 2022 for APAC cloud

This version of the Release Notes includes all items that have been deployed during this maintenance release cycle.

- Studio Automated Subtitles use speech recognition to generate text from a Speaker's audio. When enabled, subtitles appear to an Attendee as an overlay on the lower third of a video during a Live, Simulive, or On-Demand Studio webcast. Each Attendee can choose to toggle subtitles on/off within the Video panel.
