# Streaming Product Release Notes 15.3 October 1<sup>st</sup>, 2021

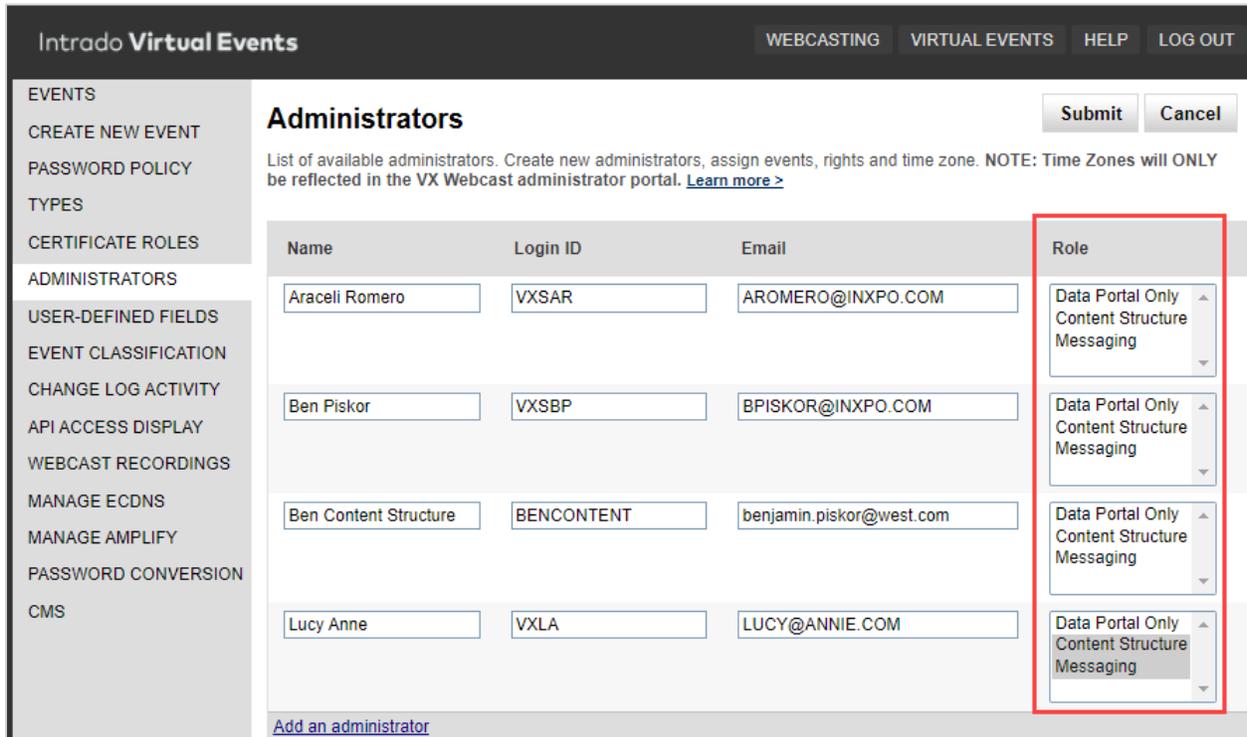

# Virtual Events

## New Features

### VE Admin Roles

Within Virtual Events, administrators can be configured with specific access roles to the administrative portal. This provides different access levels to each administrator, allowing them to only gain access to areas they will be working in. This also allows for administrators to be trained in only the specific areas that they will be doing configuration work.

When configuring administrators, the “Role” field has been updated to allow for multiple roles to be assigned to an administrator.

**Intrado Virtual Events** WEBCASTING VIRTUAL EVENTS HELP LOG OUT

**Administrators** Submit Cancel

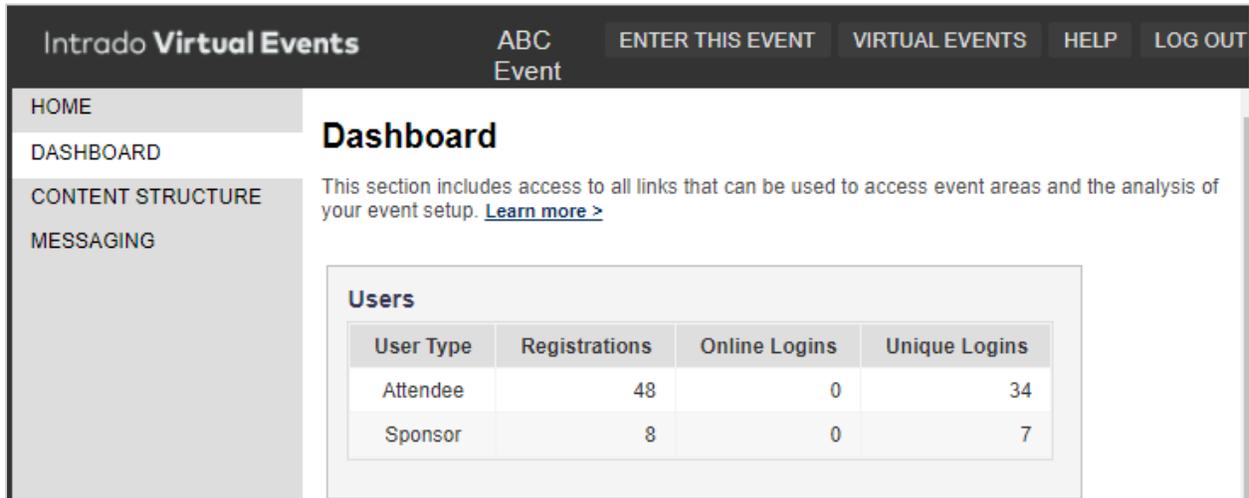

List of available administrators. Create new administrators, assign events, rights and time zone. NOTE: Time Zones will ONLY be reflected in the VX Webcast administrator portal. [Learn more >](#)

Name	Login ID	Email	Role
Araceli Romero	VXSAR	AROMERO@INXPO.COM	Data Portal Only Content Structure Messaging
Ben Piskor	VXSBP	BPISKOR@INXPO.COM	Data Portal Only Content Structure Messaging
Ben Content Structure	BENCONTENT	benjamin.piskor@west.com	Data Portal Only Content Structure Messaging
Lucy Anne	VXLA	LUCY@ANNIE.COM	Data Portal Only Content Structure Messaging

APAC cloud environment deployment: September 28, 2021  
NA data center deployment: October 1<sup>st</sup>, 2021

Based on the roles an administrator is granted, the areas along the left hand navigation will be displayed or hidden based on access.

The screenshot shows the Intrado Virtual Events dashboard for an event titled 'ABC Event'. The top navigation bar includes 'HOME', 'DASHBOARD', 'CONTENT STRUCTURE', and 'MESSAGING'. The main content area is titled 'Dashboard' and contains a summary of event statistics. A table titled 'Users' displays the following data:

User Type	Registrations	Online Logins	Unique Logins
Attendee	48	0	34
Sponsor	8	0	7

## Studio

### Updates

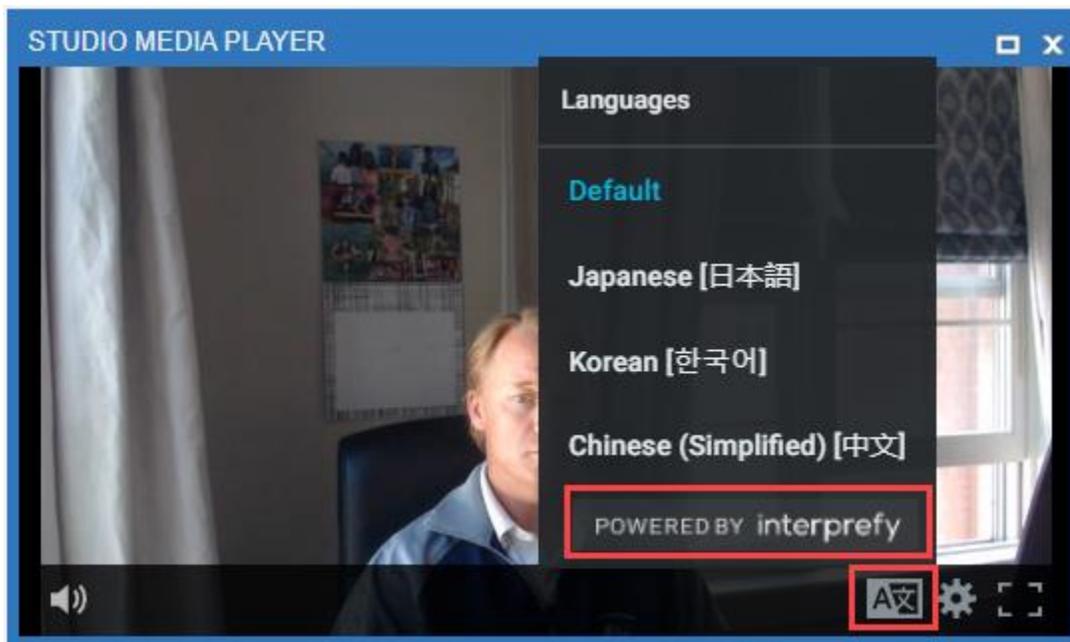

#### Multi-Language Audio Tracks

There are several updates to the Studio multi-language audio feature for both the attendee view and within the presenter console.

#### **Attendee View**

The attendee view has been updated with a new multi-language icon that resides on the player. Previously, the language audio track selection was part of the “settings” icon. Also, when Interprefy is being used for interpretation, “Powered by Interprefy” will appear on the language selection menu.

Additionally, the multi-language icon that appears in the slide panel when alternative language slides are added to the webcast has been updated to match the one in the media panel.

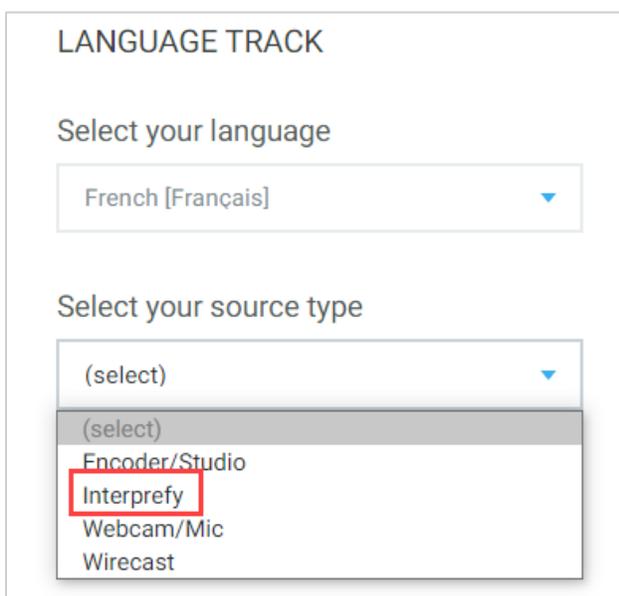

## Presenter Console

Within the presenter console, there is a new source type under Language Track called “Interprefy”. This source type should be used any time the Multi-language Audio Track feature is utilizing our partnership with Interprefy.

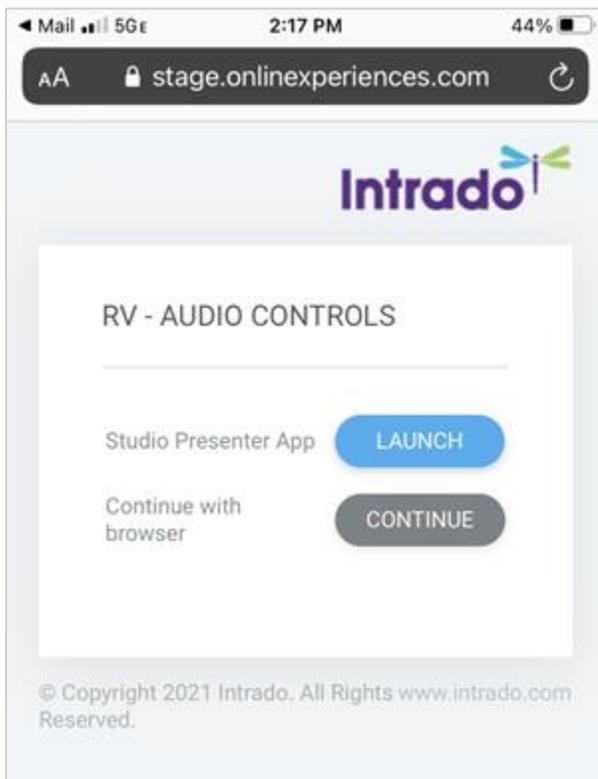

With our Interprefy integration, it allows a dedicated Interprefy team to handle all interpreter connections, equipment, and testing, without each interpreter needing to log into Studio at all.

## Studio Presenter App

The Studio presenter app has been updated to include a launch page for speakers on a mobile device. When a speaker accesses their staffer link for a Studio webcast from their mobile webcast, they will be brought to the below page where they can launch the presenter app and be seamlessly logged into the app.

Additionally, the app has been updated to be available for events running in the APAC Cloud Environment.

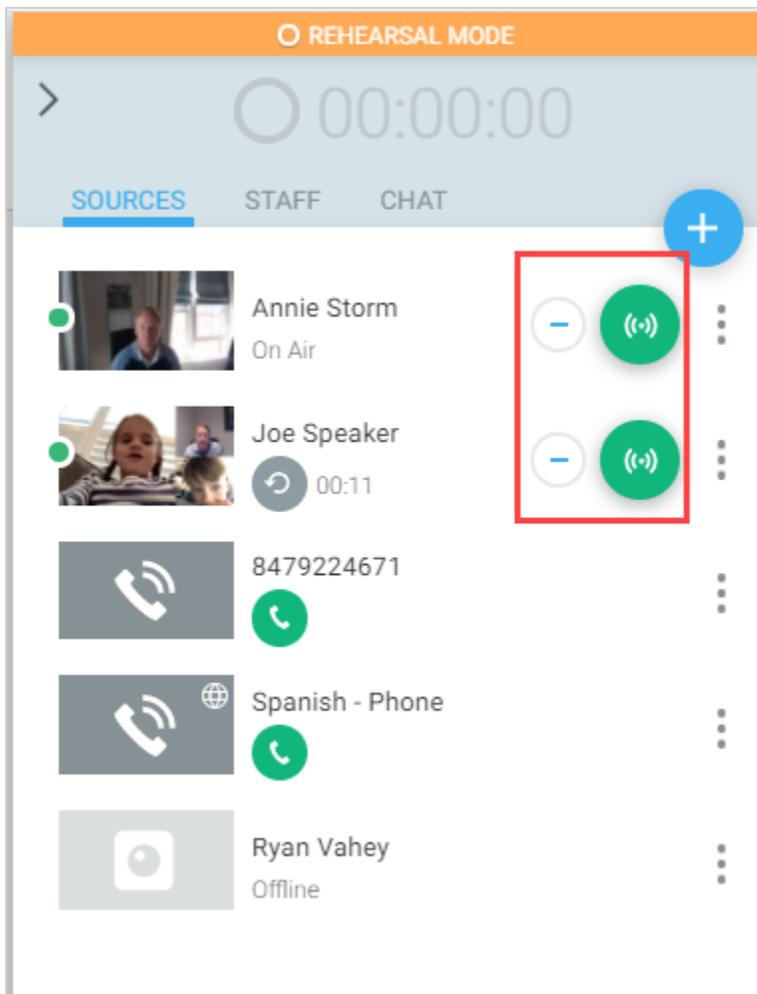

## Rehearsal Mode

Studio Essentials tenants will now allow multiple sources in the scene during rehearsal mode only. This will allow engineers to perform pre-call duties via webcam with multiple speakers in the scene at once.

Once the webcast goes live, the ability to add multiple sources into the scene will be removed. While live, the plus buttons will be hidden for all sources, leaving only the radio button available. Engineers will be switching sources one at a time, just as they would today for Studio Essentials webcasts.

If more than one source is in the scene at the time the webcast goes live, all sources will be removed from the scene automatically. The engineer would then re-add a single source to the scene once live.

## Cross Platform

### New Features

#### New Platform Language Support (Bahasa Indonesia, Thai, Vietnamese)

Bahasa Indonesia, Thai, and Vietnamese have been added as supported languages to the platform. These languages will be available to select in the user profile and will dynamically display all system text in the selected language that the user has defined. They will also be available for use with Multi-language Audio Tracks and Multi-language Slides.

#### Language Options

- Bahasa Indonesia [1057]
- Chinese (Simplified) [中文] [2052]
- Chinese (Traditional) [中國 (繁體)] [1028]
- Czech [český] [1029]
- Dutch – Netherlands [Nederlands] [1043]
- English - United Kingdom [2057]
- English United States [1033]
- French [Français] [1036]
- French Canadian [Français Canadien] [3084]
- German [Deutsch] [1031]
- Greek [ελληνικά] [1032]
- Hebrew [עברית] [1037]
- Hungarian [1038]
- Italian [Italiano] [1040]
- Japanese [日本語] [1041]
- Korean [한국어] [1042]
- Polish [polski] [1045]
- Portuguese Brazilian [Português brasileiro] [1046]
- Romanian [1048]
- Russian [росыјски] [1049]
- Slovak [1051]
- Spanish [Español] [1034]
- Thai [1054]
- Turkish [Türk] [1055]
- Ukrainian [Український] [1058]
- Vietnamese [1066]
