# Studio

- Addressed an issue with the slide list within the presenter console where the Edit and Delete buttons displayed "undefined" as the hover text.

- Addressed an issue with screen share not displaying by staffers in the presenter console if they refreshed or were not logged in when the screen share started.

- Optimized the Studio webcast drilldown reports that are accessed via the data portal which addresses issues seen in the past with exporting large user lists due to file size.

- Removed the "Webcast Embed" option from the Tools section in Studio Webcasting.

- Addressed an issue with badges getting a "null" value in marketing automation data transfers.

- Addressed an issue with the CPE certificate thumbnails not displaying within certificate browser.
