Emoji Reporting

In the Studio presenter console, speakers can view the real-time emoji activity during the live/simulive webcasts. The counter will update as attendees engage with the emojis throughout the webcast.

Additionally, there is a new report available in the data portal that displays the overall emoji activity for the live/simulive webcast. The report will display a list of emoji reactions with the unique count of attendees that selected the reaction and the total count of reactions that were selected during the webcast.
